

Lakeside Village
Manager's Report
May 22, 2012

1. Aqua Rec said they will have the pool open this week, would you check and see if they got the heater on yet?

2. Attached is an invoice from Acclaim Plumbing; I feel this toilet does need to be replaced with one that flushes. Cindy said someone keeps using the men's room and clogging the toilet and she said she will not clear it anymore. This toilet has been a slow flusher forever, and we know it is not the line.

3. Attached is a list of needed concrete repairs from 2010; there were insufficient funds to deal with it at that time.

4. Did Jeff from MCE ever get back to you with a proposal for repair of the underground electrical for the lights? If not I will contact him tomorrow, please let me know.

5. On the bench installation, do you need Ron from NW Home Improvement to install pads for those? It would be good if the benches were already assembled so they know the exact placement of bolts. Concrete doesn't leave much wiggle room for error.

6. Pool Permits have been applied for.

7. Tim should be applying lime soon, removing dead shrubs and they should be starting on the goose fence repair soon.
